Campus Professional

The **Campus Professional** was founded to provide a space where companies and institutions in the sector could liaise with the architects' collective. The architectural sector is increasingly complex and the rate at which it is evolving makes it essential for professionals to keep up with developments. The participation of every stakeholder in the sector is vitally important in this process.

The Campus Professional aims to promote competitiveness, production and efficiency in the sector by means of activities planned specifically for this purpose.

Some of these actions include:

- Technical seminars
- Themed trade fairs
- Product exhibitions
