What aspects are identified as problematic when dealing with the deployment of renewable energies? Renewable energies are considered a clean and almost inexhaustible resource provided by nature, but the strategies for their implementation in the territory are generating some discrepancies.

On Tuesday 24 October 2023, the Tarragona, Lleida and Ebre Demarcations of the College of Architects of Catalonia (COAC) are organizing, together with the Urban Architects Association of Catalonia (AAUC), **the conference 'RENOVABLES - LANDSCAPE - URBANISM'**, at the assembly hall of COAC Tarragona, (Carrer Sant Llorenç, 20-22), with the aim of explaining and debating the situation of renewable energies and how they affect the territory.

The videos of the day have been uploaded to COAC Tarragona's YouTube:
